

# our leading-edge technology **adds hope.**

One of the world's most advanced and powerful cancer-fighting treatments is the Helical Tomotherapy unit. This image-guided radiation therapy treats cancer more precisely without damaging a patient's healthy tissue, and is expected to be the therapy of choice around the world by 2012. That's why M. D. Anderson Cancer Center Orlando uses Helical Tomotherapy right now, one of only a few facilities in the U.S. By using the most advanced cancer-fighting technology in the nation, M. D. Anderson – Orlando gives hope to their patients – the most hope for survival.
